

Terminó sus estudios de auxiliar clínico veterinario en 2000 y ha cursado recientemente un postgrado de Emergencias y UCI impartido por Improve veterinary education.

Ha realizado prácticas en varios hospitales de pequeños animales en UK, y también se ha formado en temas sobre primatología, bienestar y conservación de primates en varios centros en UK y en España. Ha seguido su formación asistiendo a congresos nacionales e internacionales durante toda su carrera profesional.

Es la directora de la revista ClinATV para ACVs, de Multimédica ediciones veterinarias. Ha participado como ponente en varios congresos nacionales para ACV, ha participado como autora de un capítulo del Manual del ATV de Multimédica ediciones veterinarias y ha presentado pósters en varios congresos nacionales.

Actualmente es la responsable del equipo de ATV de pequeños animales del Hospital Clínico Veterinario CEU. Su área principal es la hospitalización y UCI y le interesa el manejo del dolor, la cardiología y el bienestar animal.

She completed her studies as a Veterinary Clinical Assistant in 2000 and has recently undertaken a postgraduate course in Emergency and Intensive Care, delivered by Improve Veterinary Education.

She has completed internships at various small animal hospitals in the UK and has also received training in primatology, welfare, and primate conservation at several centers in both the UK and Spain. She has continued her professional development by attending national and international conferences throughout her career.

She is the editor-in-chief of ClinATV, a journal for ACVs, published by Multimédica Ediciones Veterinarias. She has participated as a speaker at several national conferences for ACVs, contributed as a co-author to a chapter in the ACV Manual by Multimédica Ediciones Veterinarias, and has presented posters at various national conferences.

She is currently the head of the small animal Veterinary Technician team at the CEU Veterinary Teaching Hospital. Her main area of expertise is hospitalization and intensive care, and she has a strong interest in pain management, cardiology, and animal welfare.
